

Need to **Stay Connected?** Go to the head of the class.

The Panasonic Multi-Cell DECT System keeps you in constant touch with colleagues even when you have to leave your classroom.

Panasonic DECT Wireless Solution for Education

Anytime, Anywhere Access

Panasonic DECT handsets allow you to roam freely and still communicate seamlessly and effectively. Wherever you are -- in a hallway, in the gym, on the field or in the auditorium -- you can answer calls just as if you were in the faculty room or in the classroom.

Models for Every Need

The DECT handset line from Panasonic includes standard, compact, and ruggedized models. The compact KX-TD7695 fits snugly in a jacket pocket, and the IP54 dust and splash resistance of the KX-TD7696 is great for anyone who spends a lot of time with sports clubs both on the athletic field or in the gym.

Convenient and Scalable Solution

Panasonic DECT wireless coupled with your Panasonic KX-TAW/TDA/TDE/NCP communications system offers the ideal mobile communications solution with up to a maximum of 128 cell stations.

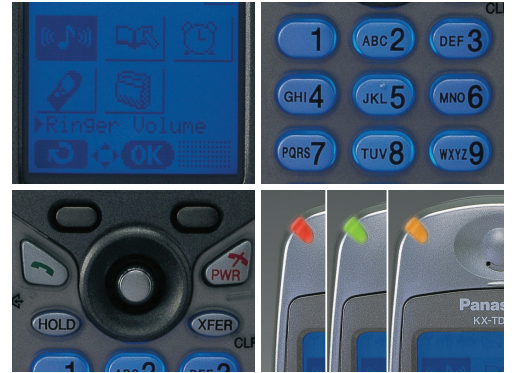

Panasonic ideas for life

Communication Made Easy

Panasonic offers reliable, flexible solutions for education.

Elegant, Smart and Sturdy - Campus Mobility Terminals

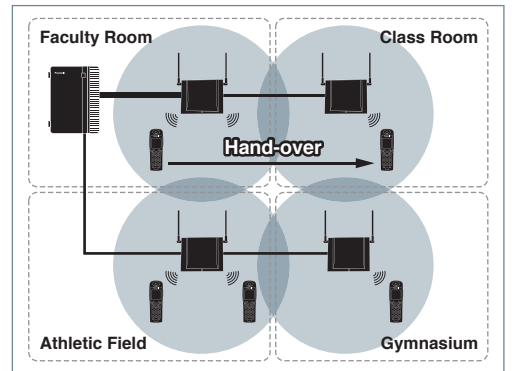

Handsets have a large, 6-line, blue backlit LCD and include all the features you'd expect such as Caller ID, personal and system speed-dials, and a built-in 100-entry phone book and distinct ring/LED options. The handset includes an intuitive Graphical Icon Menu and dynamic Operation Guidance with Soft Keys and a built-in Joystick.

Seamless Connectivity

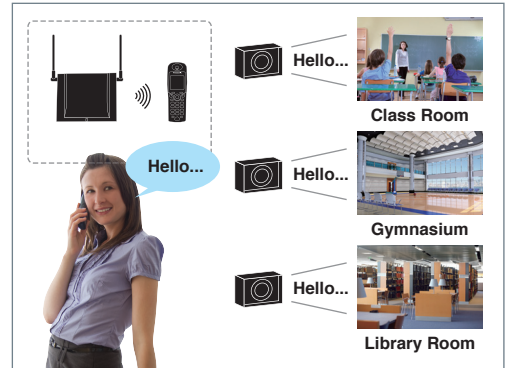

This system provides automatic hand-over between installed cell stations - enhancing coverage and giving you true communication mobility even within large premises. Maintain high connection quality as you walk around, moving from one cell station area to the next while continuing with important business conversations.

With Panasonic DECT, multi-system Registration allows you to roam across up to 4 different phone systems with one wireless DECT handset for maximum flexibility.

Flexible On-campus Broadcasting

Broadcasts can be made on campus from wireless terminals via speakers to notify students when needed. A simple operation lets you use a wireless DECT handset as a microphone for the school PA system. That means you don't have to go all the way to the broadcast room each time you want to announce something. It's also handy for fire drills and other school functions.
